

POLICY STATEMENT

At KTS and YRRS, we recognise the need for all companies both large and small to take a role in protecting the environment for the future. Due to the nature of our business activities and the associated environmental aspects and impacts, we are committed to continuously monitoring, managing, and promoting environmentally responsible practices.

OUR COMMITMENT

To this end we are committed to:

1. Take a leading role in the waste management industries by setting an example for environmental management.
2. Set, monitor and review objectives and targets to ensure the continual improvement of our environmental performance.
3. Comply with applicable legal requirements and cooperate with public authorities to ensure that contingency procedures - *to both prevent environmental incidents and limit the impact of any accidental discharges to the environment* - are established, maintained and updated.
4. Adopt all new industry standards and where possible exceed them, by economically viable application of the best available technology.
5. Protect the environment and prevent pollution by proactively managing risks and implementing measures to reduce resource consumption, emissions, waste generation, and our overall carbon footprint.
6. Ensure that employees, at all levels, foster a sense of responsibility for the environment, are empowered to contribute to continual improvement and achieve positive environmental outcomes.
7. Provide training to ensure all staff are competent in best business practices and environmentally responsible work practices.
8. Ensure that all contractors, subcontractors and suppliers adhere to our high environmental standards.
9. Endeavour to supply information to our customers on the proper handling, use and disposal of products and services provided by KTS & YRRS Recycling Services.

This Environmental Policy is fully aligned with and reinforces the objectives set forth in the Climate Change and Greenhouse Gas Reduction Policy.

Top management is responsible for ensuring that adequate resources are provided to implement, maintain, and continually improve this Environmental Policy and the Environmental Management System.

This policy was approved by Mark Jeffs, Managing Director on 27 May 2026.
